Sprint 1:

1. Scrum Meeting on 10/28
   a. Nick
      i. What did you work on yesterday?
         1. Nothing tbh
      ii. What are you working on today?
         1. Deciding on a framework.
      iii. What blockers did you have?
         1. Nothing yet, we're too early in.
   b. Ismat
      i. What did you work on yesterday?
         1. Nothing; it was the first meeting
      ii. What are you working on today?
         1. Discussing potential frameworks with group members
      iii. What blockers did you have?
         1. Too many options to choose from
   c. Neb
      i. What did you work on yesterday?
         1. Learning express JS on youtube
      ii. What are you working on today?
         1. Discussing potential frameworks with group members
      iii. What blockers did you have?
         1. Struggled to get a grasp on express JS
   d. Aadith
      i. What did you work on yesterday?
         1. I worked on learning how to use NodeJS, Express, and EJS
         2. Just trying to figure out different frameworks
      ii. What are you working on today?
         1. I will continue to learn about the different frameworks and understand how we can connect to our postgreSQL database
      iii. What blockers did you have?
         1. I'm just struggling to understand how everything works together, but I will keep at it!
2. Scrum Meeting on 11/1
   a. Nick
      i. What did you work on yesterday?
         1. Chose node js and express.
      ii. What are you working on today?
         1. My csce 313 pa.
      iii. What blockers did you have?
         1. I cant figure out how to debug file transfer i get like a 55 line error
         2. Dr kebo
   b. Ismat
      i. What did you work on yesterday?

1. Decided on Node.js and Express
            ii. What are you working on today?
                        1. I will work on setting up Node.js on my PC
            iii. What blockers did you have?
                        1. Powershell was giving errors for unknown modules
    c. Neb
            i. What did you work on yesterday?
                        1. Decided to work with Node.js and express with team members
            ii. What are you working on today?
                        1. Frontend HTML files for our front pages
            iii. What blockers did you have?
                        1. Order cart feature on our website doesn't work
    d. Aadith
            i. What did you work on yesterday?
                        1. I worked on learning how to use the pg module
            ii. What are you working on today?
                        1. If I have an adequate understanding of the pg module, I will try to work on the Google APIs we need to use and set up an account with it.
            iii. What blockers did you have?
                        1. No blockers as of yet as I'm struggling to learn
3. Scrum Meeting on 11/5
    a. Nick
            i. What did you work on yesterday?
                        1. Learning to use Node and express
            ii. What are you working on today?
                        1. Converted html to ejs.
            iii. What blockers did you have?
                        1. No notable blockers
    b. Ismat
            i. What did you work on yesterday?
                        1. Watched videos on difference between html and ejs
            ii. What are you working on today?
                        1. Converted existing files from static html files to ejs
            iii. What blockers did you have?
                        1. File structure problems caused our webpage to break
    c. Neb
            i. What did you work on yesterday?
                        1. Worked on HTML files for our frontend HTMLs
            ii. What are you working on today?
                        1. Worked on CSS files for our frontend HTMLs
            iii. What blockers did you have?
                        1. CSS flexbox for some elements
    d. Aadith

        i.   What did you work on yesterday?
1. I worked on understanding the Google App Console and how to set up credentials
        ii.   What are you working on today?
1. I worked on implementing the back-end implementation for Google OAuth 2.0
        iii.   What blockers did you have?
1. I could not figure out how to render different pages with a button onclick
2. I also struggled with EJS template implementation but it seems like Neb knows the solution
3. There are not enough YouTube videos for me to avoid documentation

Sprint 2:
